PROJECTS

Self Care

An app to find your nearest barber

- This was a cross platform mobile application using React Native, Node.JS and MongoDB.
- Implemented Node/ Express.js server, which interacted with MongoDB database for secure retrieval and storing of data.
- Using Redux, was able to achieve greater maintainability and easier debugging of application.
- Responsible for designing and implementing the UI (user interface), which entailed ensuring consistency and standards were observed across both Android and IOS platforms.

Zimvoice

A personal social media web application

- Features: posting, commenting, uploads
- Created with reference to MVC architecture using PHP's Laravel framework
- Reduced record retrieval times, by implementing more robust SQL queries while maintaining data integrity
- Responsible for testing, continuous integration, deploying and maintenance of application

Landscapes API

A RESTful API

- Designed and implemented RESTful API using PHP and Laravel
- implemented persistent storage using a MySQL database
- using React.js was able to asynchronously fetch and display required resources from server
- Utilized Git and Heroku-CLI for continuous integration and deployment of application during different stages of development life-cycle.

AWARDS & ACHIEVEMENTS

Kaggle - Machine Learning Competition

Trained a model to predict house prices using linear regression techniques
