EDUCATION

Computer Programmer Analyst, George Brown College

Related Courses

- Advanced Database Development (PL/SQL)
- Fullstack Development (MERN stack)

Bachelor of Commerce, University of South Africa

TECHNICAL SKILLS

Languages: PHP | Java | JavaScript (Vanilla JS + ES6) | Python

Web Technologies: HTML5 | CSS3 | ASP.NET

Frameworks & libraries: React.js | Redux | React Native | Bootstrap | Laravel

Databases & Servers: Node.js | MySQL | MongoDB | Apache

Other: Git | Github | Firebase Google Service

PROJECTS

Burger Artisan

Web App: React.js | Redux | Firebase

- Implemented frontend architecture using react and react-router for a flexible single-page application
- Integrated Redux and Redux thunk, resulting in more maintainable application state and easier debugging thereof.
- Used Google firebase to asynchronously fetch and store application data and authenticate users.
- Implemented code splitting and lazy loading to improve overall application performance and to allow for improved SEO rating
- Utilized custom CSS3 modules to develop reusable UI components
- Deployed application on firebase

ZimVoice

Web App: PHP | Laravel | MySQL

- Created social media application using PHP's MVC framework (Laravel)
 - Optimized database queries to allow for improved retrieval times and overall data integrity.
 - Responsible for testing, deploying and maintenance of application
 - Drove continual improvement to system architecture by refactoring old legacy code.

FireCharge

Web App: *PHP | MySQL | Bootstrap 3*

- Collaborated with team of 3 members to implement app using PHP without use of external libraries
- Created PHP scripts to connect application to MySQL database.
- Utilized Git and Heroku-CLI for versioning and application deployment

AWARDS & ACHIEVEMENTS

Kaggle - Machine Learning Competition

Trained a model to predict house prices using linear regression techniques using Python.

WORK EXPERIENCE

DownTime Solutions: Freelance developer | 2019 to present

- Charged with bringing conceptual ideas to life using various programming languages and technologies.
- Worked on native mobile application using React Native and 3rd party APIs which interacted with user data.
- Collaborated with product team, assisting in the improvement of value proposition and overall user experience.
- Assisted in risk analysis and mitigation of assessed risks, ultimately leading to increase in business efficiency.
- Interacted with both technical and non-technical stakeholders providing feedback on the overall product development status.

Wozani Lodges: Freelance developer | 2018

- Charged with maintenance of web booking application
- Updated CSS media queries to improve user experience across different device sizes and SEO rating
- Implemented necessary bug fixes using HTML, CSS and Javascript, to address browser compatibility issues
