Edmonton, AB

EDUCATION

Computer Programmer Analyst, George Brown College

Bachelor of Commerce, University of South Africa

TECHNICAL SKILLS

Languages: *PHP | Java | Javascript | ES6 | Python*
Web Technologies: *HTML5 | CSS3 | ASP.NET*
Frameworks & libraries: *React.js | Redux | React Native | Bootstrap | Laravel*
Databases & Servers: *Node.Js | MySQL | MongoDB | Apache*
Other: *Git | Github | Firebase Google Service*

PROJECTS

Burger Artisan

Web App: *React.js | Redux | Firebase*

- Implemented frontend architecture using react and react-router for a flexible single-page application
- Integrated Redux and Redux thunk, resulting in more maintainable application state and easier debugging thereof.
- Used Google firebase to asynchronously fetch and store application data and authentication of users.
- Styled application using custom CSS3
- Deployed application on firebase

ZimVoice

Web App: *PHP | Laravel | MySQL*

- Created social media application using PHP's MVC framework (Laravel)
- Optimized database queries to allow for improved retrieval times and overall data integrity.
- Responsible for testing, deploying and maintenance of application
- Drove continual improvement to system architecture by refactoring old legacy code.

FireCharge

Web App: *PHP | MySQL | Bootstrap 3*

- Collaborated with team of 3 members to implement app using PHP without use of external libraries
- Created PHP scripts to connect application to MySQL database.
- Utilized Git and Heroku-CLI for versioning and application deployment
